Work Experience

Founding Engineer - Compass Labs Ltd

October 2024 - Present

- Founding engineer at an Andreessen Horowitz - backed DeFi infrastructure startup.
- Delivered over 1000 GitHub contributions in 11 months, including to the LangChain repo.
- Built and maintained the Universal DeFi API in Python using FastAPI and Pydantic.
- Designed and shipped production endpoints returning unsigned transactions for major DeFi protocols.
- Created CI/CD pipelines that automatically generated and tested downstream Python and TypeScript SDKs from OpenAPI specs.
- Designed and implemented custom Aave analytics endpoints for a paying institutional clients (interest rates, volatility, utilization ratios, TVL, and historical transactions).
- Authored and published research on EVM transaction bundling efficiency, demonstrating 50-70% gas savings.
- Led developer relations engineering: produced educational content and video tutorials for enterprise users (e.g. MoonPay).
- Proposed and led implementation of new product features: intention-based API design, gasless endpoints, allowance-free UX, and embedded bundling.

Customer Success Manager - Wolfram Research

March 2024 - June 2024

- Managed relationships with top-paying Enterprise Customers (pair-programmed with them).

Customer Facing Mathematica Programmer - Wolfram Research

June 2022 - March 2023

- Solved over 1200 complex math and programming problems for clients including Boeing, the US Navy, Raytheon, and renowned physicists, e.g. Andrew J. Hanson.
- Acted as the team's subject matter expert for the OpenAI API integration into Mathematica, solving over 200 cases in this area.
- Developed an intelligence augmentation system leveraging the OpenAI API that made me 5x more productive.
- For my final year I held the highest customer satisfaction rating in the global Wolfram Technology Group.
- Achieved a perfect score on the Wolfram Entrance Exam, solving many puzzles including programming **this**.

Founder in Residence - Entrepreneur First, London

Mar 2022 - June 2022

- I was accepted into the 2022 cohort and spent 4 months brainstorming and collaborating with some of the smartest minds of my generation.
- EF is a talent investor/startup incubator with a 3% acceptance rate. It is backed by Founders Fund, with notable figures including Reid Hoffman (LinkedIn), Peter Thiel (PayPal), and Demis Hassabis (Google DeepMind).

Python & SQL Programmer - Liqquid, London

May 2021 - April 2022

- Wrote code to estimate house prices using large datasets of property features and historical prices in the UK.
 - Developed a image processing pipeline that extracts valuable data from floorplan images and images of energy performance certificates.
-

Education

Dip. Applied Mathematics - University of Galway

Sep 2019 - Sep 2020

- First Class Honours with Overall Grade 82%
- **Thesis - Wrote the first chapter of a cookbook of SAT Solver recipes. Provided a recipe to encode John Conway's Game of Life in Boolean logic and investigated the Boolean Satisfiability Problem in this context.**

B.Sc. Applied Physics - University of Galway

- First Class Honours with Overall Grade 75%
 - Thesis: Detection and localization of exoplanets in direct image sequences using deep learning
 - School of Physics Gold Medal
 - Awarded two funded summer internships
-
